

AIRCRAFT

Aircraf Guide

Aircraft (Beta) - Introduction

Greetings Survivors, in this guide we will cover some introductory information regarding how the **Aircraft** system works. Let's get into it!

What's Aircraft system?

- Players who reached Lv. 18 in SX Clash of Powers and beyond can unlock Aircraft system in the building **Hangar**.
- The Aircraft system consists of two parts: **[Aircraft Modules]** and **[Aircraft Retrofit]**.
- The building Hangar manages and upgrades Aircraft Modules, unlocking Retrofit buffs through Blueprint Design.
- The Hangar's **level cap** increases gradually as the season advances, and its level resets to 1 at the beginning of a new season.
- Currently, upgrading Hangar does **not** contribute to Power or Combat Power.

Hangar

Version 7.12.0

Aircraft Modules

- Each aircraft includes **four Modules** (**Dropload**, **Body**, **Frame**, **Tether**).
- Upgrading Modules enhances the **attack**, **health**, and **defense** stats of all formations.
- The crafting and upgrading of modules require **Gear** and **Tensile Coils**. Upgrades **permanently enhance** the attributes of all formations.
- Modules can be **reset** using **Rubies**. Resetting will remove the Module, requiring it to be crafted again, but all resources spent on upgrades and crafting will be fully refunded.
- Modules contribute to both Power and Combat Power.
- Module upgrades and crafting progress will **not** reset when entering a new season. Module levels will be retained across all seasons.
- Aircraft will be displayed alongside your marching formations on the world map.

Version 7.12.0

Aircraft Retrofit

Blueprints can be obtained through Blueprint Design and are used to activate various Retrofit buffs.

- Blueprint Design functions the same as **Technology research**, requiring research materials and occupying one research queue.
- Only one research queue can be used for Blueprint design at a time.
- The number of obtainable Blueprints is capped and depends on **the Hangar's level**. Once the cap is reached (including ongoing and completed designs), no further Blueprint design can be performed.
- Use blueprints to activate **Retrofit buffs**, which provide various attributes boost for offense, defense, and development.
- The Offense and Defense Retrofit buffs **only** apply to Clan Building Battles.

SURVIVORS

Version 7.12.0

Retrofit Setups

- You can save up to **three setups** and **freely switch** between them. Free switches will enter a cooldown period after use, and additional switches will require Rubies.
- All setups share free **reset** chances. Resetting fully refunds all allocated Blueprints. If the free reset is used up, Rubies are required.

SURVIVORS

Version 7.12.0

Season Reset Rules

- At the start of a new season, the **Hangar** will reset to level 1, and all obtained **Blueprints** (including those already used) will be cleared.
- If there are ongoing Hangar upgrades or Blueprint Design at the time of the reset, their progress will be terminated, and no resources (including speed-up items or Rubies) will be refunded.
- **Season rewards** will be calculated based on the Hangar level and the total number of Blueprints held before the reset. Final rewards will be sent via mail.
