Introduction

REGIONAL TRANSFERS - INTRODUCTION

To relocate to a different region, firstly you will need to enter the region menu by zooming out on the map and tapping the icon on the bottom left.

From there you will be able to choose which region you want to relocate to. Remember that you can only relocate to regions that you **shared a map** with in the previous season.

Finally, once your choice has been made you can tap on **“Relocate”** and the system will check if you meet the needed requirements.
